

Color Quarterly 4th Quarter 2018

Designers from over 120 brands and retailers rely on CSI to select their seasonal color palettes. The Color Quarterly report offers important hindsight into color direction and validation for fashion and product designers. The data is selected from the top 100 [ColorWall](#) colors that brands and retailers choose for their seasonal palettes. Using our proprietary Relative Color Popularity process, we create mood boards based on the most popular colors from the quarter. To find out more about CSI's in-depth color and trend consultation please visit csicolors.com
