

Spring / Summer 2015 | Rustic Summer

In the midst of the summer, earth is fertile and tender. The abundance of sunlight makes us feel grateful and pure. Rich tones of brown leather, spicy hues of orange and red, “raw” neutrals are the core of this “earth-driven” palette with a true organic appeal.

The use of earthy tones is essential with bright colors for a spicy accent. Apricot orange brings fresh vibe in the palette. Dark navy is added as a softer alternative for using black. Tribal prints and simple geometric patterns are an interesting addition to the theme. Surfaces are smooth and soft; fabrics vary but predominantly go for a natural appeal.
