The Vibrant Colors of Puerto Rico | Travel

The colorful storefronts paired with the tropical surroundings created a vibrant color palette around every corner. The lack of coordination between storefronts somehow created perfect harmony between colors. I spent a week basking in the warm sun by the shore, exploring the rainforests that hug the outer parts of the cities and walking up and down the streets filled with small cafes and afternoon markets. My week in Puerto Rico was well spent with friends and I look forward to returning!
